Hi!

I'm Salsa, a passionate graduate of Architectural Engineering Education interested in interior and residential design. I always seek opportunities to explore and express myself through compelling and functional design. I want to contribute to any design project that meets the client's needs and desires.

Feel free to contact me if there are any further inquiries!

OTHER PROJECTS

01 CUBIC CABANAS

• Floor Plan

Cubic Cabanas

Project: Reproduce Design - Advanced Digital Design Course

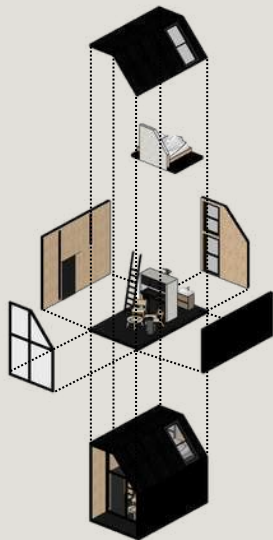

The Original Project: <https://bit.ly/41OJGqn>

Year: 2021

In this assignment, students are asked to duplicate the design as training in using architectural software. I chose the Cubic Cabanas by Liga Arquitetura e Urbanismo to reproduce the design. I display this assignment's floor plan, fourth section, exploded view diagrams, and 3D rendering.

• Sections

• Explode View Diagram

• 3D Rendering

02 CONTAINER HOUSE

Container House

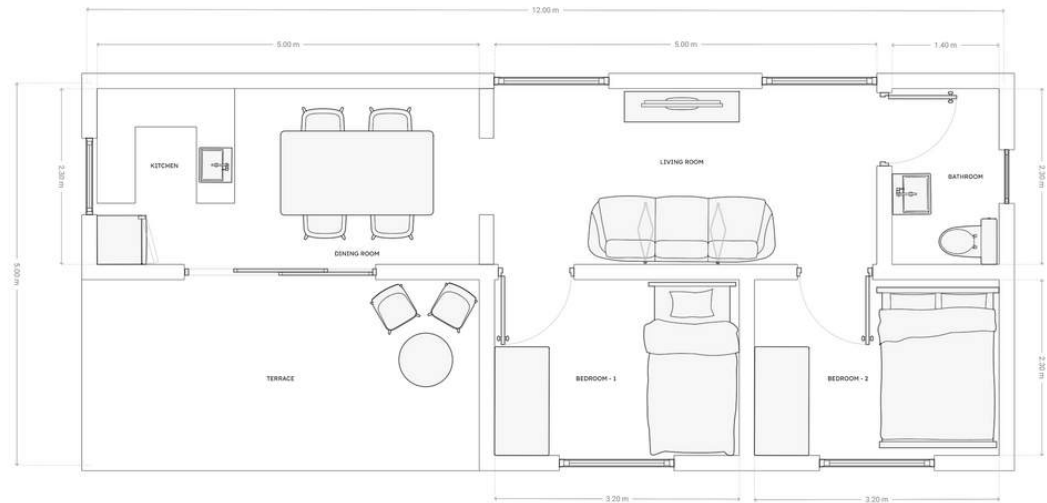

Project: Midterm Exam - Furniture and Interior Design Course

Year: 2021

Concept:

This container residence's interior design concept is the Japandi style concept. It emphasizes using natural materials such as wood that create a warm and comfortable feel. This container residence has a lounge on the front terrace, a family room, a dining room, a kitchen, two bedrooms, and a bathroom.

Modern Classic Interior

Project: Apartment Interior Design - Furniture and Interior Design Course

Year: 2022

Concept:

The central concept in this apartment design is an elegant and luxurious appearance that is minimalist. The dominant colors, beige, white, and gold, make the design look warm and comfortable. Several decorations are used in this design, including chandeliers, wall lamps, standing lamps, and mirrors. Carpet is also an element in this classic modern design.

04 SMART ECO STUDIO

Smart Eco Studio

Project: Spatial Interior Design Competition 2022
“Digi Data” x SOMA by Dekoruma

Client: Fashion Designer

Area: 30 m²

Team: Salsa | Vianda

Year: 2022

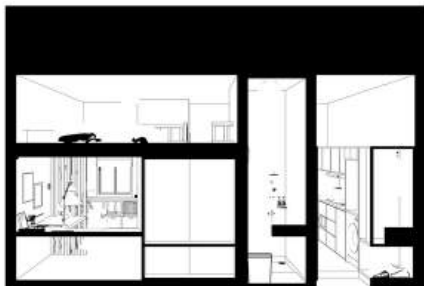

Concept:

Smart Eco Living is the application of the concept in the interior design of this apartment, which prioritizes the balance of space related to circulation and the use of materials that are easily recycled to support the health of residents and facilitate the activities of residents with functional interiors.

05 TWO-STOREY HOUSE

Two-storey House

Project: Final Project - Architecture and Arts Design Practical Course

Year: 2023

This final project is a requirement to pass the architecture and art design practical course in the UK-SERP program in which I participated. Students were asked to design a 2-story house, and I chose a minimalist concept with a fairly unique facade. It has several rooms, namely the living room, family room, kitchen, dining room, laundry, two bathrooms, and three bedrooms.
